

A2 • LOW-FIDELITY REVIEW — S07–S12

A1 low-fidelity is approved. Review this separate A2 structural batch for joining, membership, administrator approval, first saved-home guidance, and the saved-home starting screen.

REVIEW NOW

- Is it clear that a join code only requests access?
- Is community content hidden before approval?
- Are administrator actions limited to approve or deny?
- Can the first-use tour be skipped and replayed?
- Does Home clearly separate usable location from Location needed?
- Are Events, community coordination, profile and Help findable?

NOT THIS PASS

- Final wording, visual polish or brand
- Every loading/error/retry/offline variant
- S13–S16 sourced Events
- Request/Offer creation and claiming
- Provider, architecture or production behavior
- Task completion or Gate 3 closure

Comment on this A2 area only. A suggestion becomes a product decision only after John explicitly approves it and the canonical record is updated.

A2 / 00 — Joining, membership and saved-home arrival

Pass 1 structural batch • S07–S12 • eight app views across six parent families • consumer copy is draft

Primary setup: S02 native outcome → S07a code entry → S07b community confirmation → S08a pending → administrator S09a/S10a → approved → S11a tour (or skip) → S12a saved Home. No usable location routes to S12b instead.

Administrator access is role-gated and limited here to reviewing pending membership requests: S09a queue → S10a approve or deny → current queue. No member removal, moderation, incident management or community-wide phase controls.

Detailed invalid/rate-limit, denied/revoked/suspended/offline, queue error/empty, changed-request and combined Home states remain required Pass 2/A coverage unless called out beside a structural frame.

INV S07–S12 • MVP requirements: Community Joining / Saved-home tour and start • Decision log 2026-09-10 • A1 IDs and review history are unchanged.

A2 / 01 — Join and membership approval

Read left to right for the primary approval path. Alternate errors/status outcomes are named in the notes and remain required Pass 2/A coverage.

S07 — Resident / empty join-code entry

JOIN A COMMUNITY

Enter your community code

Use the COMMUNITY JOIN CODE from your invitation. A code lets you request access; it does not grant membership.

COMMUNITY JOIN CODE *

Enter code

NO COMMUNITY CONTENT YET

Until an administrator approves your request, you cannot see members, Requests, Offers or community activity.

Continue

S07 • Empty entry state. Continue is unavailable until a code is entered.
A code can reveal only the community name for confirmation; it never grants membership or exposes group content.
Invalid, failed/rate-limited, submitted and pending variants remain required Pass 2/A coverage.
SOURCE: INV S07; REQ Community Joining.

S07 — Resident / valid-code confirmation

CONFIRM COMMUNITY

Request to join?

This valid code identifies one configured community. Confirm it before sending a membership request.

BOULDER HEIGHTS

This is the only community detail shown before approval.

APPROVAL REQUIRED

Requesting access does not reveal members, Requests, Offers or activity. John reviews the request.

Request to join

Use a different code

S07 • Valid-code confirmation. Community name is the only pre-approval community content.
Request to join → submitted/pending S08a after successful save; Use a different code → S07a.
Submission failure and duplicate/repeated request handling remain Pass 2/A.
SOURCE: INV S07; approved single-community/access-code rules.

S08 — Resident / membership pending

MEMBERSHIP STATUS

Request pending

Your request to join Boulder Heights was sent to the community administrator.

PENDING APPROVAL

John needs to approve or deny this request. A newer decision may appear when you check again.

NO COMMUNITY ACCESS YET

Members, Requests, Offers and community activity remain hidden until approval.

Check status

S08 • Last confirmed membership state: pending. Check status refreshes this state.
Approved → S11a on first saved-home arrival, then S12; denied may offer a new-code route when permitted.
Denied, revoked/suspended and offline last-known-state views remain required Pass 2/A.
SOURCE: INV S08; REQ Community Joining.

S09 — Administrator / pending request queue

ADMIN • BOULDER HEIGHTS

Join requests

Only the authorized community administrator can view and act on pending membership requests.

ALEX RIVERA

Verified phone • Requested today

Pending review

MEMBERSHIP ONLY

This area approves or denies join requests. It has no member removal, moderation, incident-management or community-phase controls.

Review request

S09 • Authorized administrator / one pending request. Review request → S10a.
Queue states still required: empty, loading, offline/error and multiple pending requests.
Role gate is mandatory; no resident access and no broader administrator tooling.
SOURCE: INV S09; minimal administrator decisions.

A2 / 02 — Guidance and saved-home start

Structural destinations only. Home is shown with a usable location and with Location needed; these are alternatives, not a sequential route.

S10 — Administrator / pending request review

REVIEW REQUEST

Alex wants to join

Use the verified applicant details below to approve or deny this Boulder Heights membership request.

ALEX RIVERA

Verified phone: (303) 555-0148

Requested today

APPROVAL EFFECT

Approval grants access to members, Requests, Offers and community activity. It does not create incident-management authority.

Approve membership

Deny request

S10 • Authorized administrator / pending decision. Approve or deny requires confirmation, then returns to the current S09 queue. Only enough applicant identity for the disposition is shown. No existing-member removal. Failed action/retry and already-reviewed/changed-while-open states remain required Pass 2/A. SOURCE: INV S10; minimal administrator decisions.

S11 — Resident / first saved-home tour

QUICK TOUR • 1 OF 6

Start with your saved home

A short guide shows where to find what matters. Skip it now and replay it later from Help.

WHAT THE TOUR COVERS

Navigation • current sourced conditions • community membership • Requests and Offers • your profile • replay from Help

LIGHTWEIGHT AND OPTIONAL

Move one topic at a time. Required safety and consent are not part of this skippable tour.

Next

Skip tour

S11 • First approved saved-home arrival. Next advances through six topics; completion → S12. Skip → S12. Replay starts from Help/S29 later. This representative structural frame does not finalize sequence, presentation or copy. Progression, completed and Help-replay variants remain required Pass 2/A/D. SOURCE: INV S11; REQ first-use guidance.

S12 — Resident / saved Home with usable location

YOUR SAVED HOME

25 Example Lane

Start here for your saved-home context and approved Boulder Heights membership.

CURRENT SOURCED CONDITIONS

No current condition shown in this structural example. View Events for sourced updates and their status.

BOULDER HEIGHTS • APPROVED

Open community coordination for Requests and Offers, or review membership status.

HOME SIGNALS

No signal shared. Open saved-home signals to add or review one.

Other routes: Membership • Profile • Help

View Events

Requests & Offers

S12 • Resident / usable accepted home location / approved membership. View Events → S13; Home signals → S16; Requests & Offers → S17; Membership → S08; Profile → S03/S31; Help → S29. This is a stable starting screen, not a social feed and not a community-wide phase. Combined loading/offline/condition/signal/activity states remain Pass 2. SOURCE: INV S12; saved-home-first decisions.

S12 — Resident / saved Home, location needed

YOUR SAVED HOME

Location needed

Your profile and approved Boulder Heights membership remain available, but LHL cannot personalize Events for this home yet.

LOCATION NEEDED FOR EVENTS

Until you add a usable home location, Event and alert notifications are unavailable and personalized Events do not appear in your feed.

COMMUNITY COORDINATION REMAINS

Requests, Offers and claimed-item messages still follow their normal membership, privacy and notification rules.

BOULDER HEIGHTS • APPROVED

Membership, Profile and Help remain available.

Other routes: Membership • Profile • Help

Edit address

Requests & Offers

S12 • Resident / no usable home location / approved membership. Edit address → S04a and fresh lookup; Requests & Offers → S17. Events route shows Location needed, not an empty/no-events result. Community coordination stays available. S13 repeats the correction path in Slice B. Other combined states remain Pass 2. SOURCE: INV S12; Sep 9–10 no-location decisions.

S12 HOME SHELL — FOUNDER EXPLORATION

Exploration only • approved starting information architecture • not final layout or copy

Separate from the reviewed A2 frames. Normal Home state is drawn; location-needed behavior is annotated beside it.

LOCATION-NEEDED ALTERNATIVE

Same Home shell. Replace only the Event preview; do not treat this as an empty/no-events state.

Location needed for Events

Until this home has a usable location:

- Event and alert notifications are unavailable
- Personalized Events do not appear in the feed

Community coordination and Home Status still work after membership approval.

Edit address

Everything else stays in place

- Short address remains below the LHL header
- Community Summary remains available
- Home Status remains updateable here
- Fixed five-item footer remains visible

Do not collapse these states

Location needed ≠ no current Events. The first is a capability limitation with an address-recovery action.

APPROVED STARTING STRUCTURE

Persistent global destinations

HOME — returns to/reloads this screen
COMMUNITY — Requests, Offers, membership and community-specific admin tools
MESSAGES — claimed Request/Offer threads only; unread/empty states
PROFILE — setup information, membership, Notification Settings → native OS settings
HELP — safety, privacy, tutorial replay, concern reporting and notification guidance

What the three sections mean

EVENT PREVIEW — up to three current Events, one latest timestamped state each; View all opens the full feed. Evacuation priority is approved; the rest of the hierarchy is pending.

COMMUNITY SUMMARY — community name, members, Open Requests/Offeres and per-user new/unviewed indicators; not a social feed.

HOME STATUS — last voluntary status + time, updated inline with Home/Away controls.

Intentionally unresolved

- Final copy and visual polish
- Event ordering beyond evacuation-first
- Home Status taxonomy beyond provisional Home/Away
- Detailed loading/offline/empty/stale/corrected/suspended states
- Final iconography and reusable component rules
- Provider, data model, JSON shape or production architecture

This exploration does not approve A2 low-fidelity.
