

Gate 3 Slice B - R3 founder-comments reference

Capture: 2026-09-14 after 20:39:21 UTC. Native Figma file
GzK3TcwA0mPzn90gG6fWGK.

All three root threads #58-#60 were resolved at capture. No newer top-level R3 thread appeared in the read. Live Figma controls if later activity differs. The original messages and John's replies below are exact; explanatory labels are packet metadata, not quotations.

THREAD #58 - S14 sheet 143:125 - root 1925395534

John Elliott, 2026-09-14 17:46:18 UTC:

Think this should be at the VERY TOP above the alert/event

John reply 1925591644, 2026-09-14 20:27:43 UTC:

resolved in R3 (shown in R2)

Root resolved 2026-09-14 20:27:45 UTC.

Context: S14 safety block; verify on both corrected S14 examples.

THREAD #59 - S14 sheet 143:125 - root 1925398307

John Elliott, 2026-09-14 17:48:27 UTC:

I struggle now with this being here? Should the source link be with the alert (in this case the Evacuation order box)?

This can just be about acknowledging the update.

Also, what if there are multiple updates in the history? Do you have to comeback and mark update on the most current source?

We haven't decided, but i'm also assuming THIS IS THE LANDING page for push eligible notifications? It will bring you direct to the event detail page?

John reply 1925592342, 2026-09-14 20:28:17 UTC:

resolved in R2 feedback/R3

Root resolved 2026-09-14 20:28:19 UTC.

Context: source-link relocation and exact-update

acknowledgement were corrected; push landing is recorded canonically; multi-update return remains open in Pass 2/B.

THREAD #60 - S15 sheet 143:248 - root 1925399414

John Elliott, 2026-09-14 17:49:22 UTC:

I think we should change this to:

This shows only who has clicked to acknowledge the update in <app name>. It does not...

I dont want to say "tell you whether anyone is safe". I want this to be more like "does not imply safety status". Cause like wise it also doesn't imply they are in harms-way...

John reply 1925593303, 2026-09-14 20:29:05 UTC:

We need to move this up and treat it just like YOUR SAFETY in S14

John reply 1925604780, 2026-09-14 20:39:19 UTC:

Resolved in R3 changes

Root resolved 2026-09-14 20:39:21 UTC.

Context: the unchanged two-directional disclaimer is now in a first scroll-content card with working heading WHAT THIS SHOWS. John clarified that comparable treatment did not mean the literal YOUR SAFETY heading; this is a copy starting point, not final wording.
