

Start here — A1 structural review

X01 + S01–S05 • 5 active app parent families • 9 app viewports + 1 external invitation sample • Draft for founder / Claude review

Invitee: X01 → external download/install → Resident: S01 → S02 → S03a → S03b → S03c → S04a → S04b → S05 or S05b → S07 (A2, pending)

S02: allow, deny, or defer permission; app access continues. S03b: a successful verification is required. S03c: required consent must be accepted and saved. S04a: mandatory fields must save. S05: accept a usable point or continue with a legitimate address and no usable point. No community access until administrator approval.

Read sheet 01, then sheet 02, left to right. Each panel carries its actor, state, transition, draft-copy notes, and source reference. The repository traceability index records each required state as frame, annotation, reasoned N/A, or pending named chunk. These are structural frames; controls are not a wired prototype.

INV = docs/gate-3-screen-state-inventory.md • REQ = docs/03-mvp-requirements.md • FUNC = docs/functionality-decision-log.md. Apply docs/04-decision-log.md and AGENTS.md source order. Full links, node IDs, state dispositions, and control routes are in docs/gate-3-lowfi-traceability.md.

Assess whether the contact/verification/consent sequence is clear, whether required versus optional home information is clear, and whether S05b makes continued setup unmistakable. Final copy and the S01/S11 navigation experiment remain open. No pass, layout, or product approval is implied by self-verification.

A1 / 01 — Invitation to verified phone

PASS 1 • STRUCTURAL DRAFT • Founder-authorized drawing; layouts and final copy await review.

X01 — External invitation

COMMUNITY INVITATION

You’re invited to try LHL

Coordinate practical help with people in your community and review sourced conditions near your saved home.

1 Download and install

Use the app link provided by your community administrator.

Download LHL

2 Save your community join code

COMMUNITY JOIN CODE
SAMPLE-27

You’ll enter this code after setting up your profile.

Membership requires approval

Installing LHL or having a join code does not give you access to the community. An administrator must approve your request.

EXTERNAL SURFACE • illustrative invitation, not LHL UI.
Actor: community administrator → invitee.
Download opens the administrator-supplied platform install link.
Save the separate code for S07. No membership or group content is granted here.
Sample code and copy are draft; invalid invitation recovery is annotated for Pass 2/A.
SOURCE: INV X01; FUNC Sep 3 — invitation/access.

S01 — Resident / structural step

WELCOME TO LHL

A place to coordinate

Review sourced conditions and coordinate practical Requests and Offers with your approved community.

Start with your own profile

Each adult has their own profile, even when they share a home.

A little context helps

Clear, practical information can help neighbors coordinate.

Your safety comes first

Follow instructions from public authorities. If you believe you are in danger, move to safety and call 911 when able. LHL does not contact emergency services.

Get started

Skip introduction

Already have a profile? Sign in

S01 • Resident / first visit. TEST: launch hierarchy.
Get started or Skip introduction → S02; safety stays visible here and notification limits remain in S02. Returning sign-in → S31 (Pass 1/D).
One illustrative launch message is shown; the 5–7-message rotation set and first-use sequence await navigation/Pass 3 review. Required safety copy is verbatim.
SOURCE: INV S01; REQ Trust and Tone; FUNC Sep 1 — 911 and first use.

S02 — Resident / structural step

BEFORE YOU CONTINUE

About notifications

LHL notifications can bring relevant sourced incident updates and coordination updates to your attention.

Keep other sources available

Notifications may be delayed or unavailable. LHL does not guarantee that a notification will reach you.

You remain in control

You can keep using LHL if you decline. You can change permission later in your device settings.

LHL’s notification preference is separate from your device’s permission. You’ll see that preference during home setup.

Choose notification permission

Not now

S02 • Resident / permission not requested.
Choose permission → native OS prompt (boundary only). Allow, deny, or Not now → S03a with continued app access. Denied/later-disabled recovery → device settings and S30; dedicated variants Pass 2/A.
LHL preference is a separate control in S05/S30. Native prompt design and delivery mechanics are not specified.
SOURCE: INV S02; FUNC Sep 3 — notification permission.

S03a — Resident / structural step

YOUR PROFILE

Let’s start with you

Create your own adult profile. Fields marked * are required.

First name *

Alex

Last name *

Rivera

Preferred first name (optional)

Alex

Phone number *

(303) 555-0148

Use a number that can receive a text message. We’ll send a code to verify it.

Send verification code

Back

S03a • Resident / filled contact form, before verification.
Illustrative fictional data only: Alex Rivera; reserved 555 number.
Fields map to approved inputs; no custom display name, household label, or visible member_id.
Send code → S03b on success; incomplete/invalid/save failure states Pass 2/A. Phone field is required and must receive SMS.
SOURCE: INV S03; REQ User Profile; FUNC Sep 8 — SMS/contact/member ID.

S03b — Resident / structural step

VERIFY YOUR NUMBER

Check your text messages

We sent a verification code to (303) 555-0148.

Verification code

Enter the code

Verify this number once

We verify that you can receive a code at this number. This does not guarantee future call or text delivery.

If you replace your number later, you’ll verify the new number before it becomes active.

Send another code

Change phone number

Verify number

Enter the code to continue.

S03b • Resident / code sent, awaiting input.
Enter valid code + Verify → S03c after successful verification.
Resend remains on this step; Change number → S03a. Incorrect/expired codes, resend/recovery and failed attempts → Pass 2/A.
No code length, timer, resend limit, or auth architecture selected.
Twilio is the approved provider; vendor detail stays outside the screen.
SOURCE: INV S03; REQ User Profile; FUNC Sep 8 — verification.

A1 / 02 — Consent and saved-home setup

PASS 1 • STRUCTURAL DRAFT • Sample data and map are illustrative. Review notes sit outside app screens.

S03c — Resident / structural step

MEMBER CONTACT

How members can reach you

Phone verified

(303) 555-0148

Approved members of your community can use Call or Text on your profile to open their device's phone or messaging app.

Your number is not printed on your community profile, but the native app may reveal it to the other member or their device.

LHL does not send, store, or guarantee delivery of those calls or texts.

☐ I agree to member contact

Required to participate in the pilot.

Your home address and entry instructions remain private unless you deliberately share them for a claimed task.

Continue

Accept the required consent to continue.

Back

S03c • Resident / phone verified, required consent unchecked. The single consent is mandatory. Continue is unavailable until checked; accepted consent + successful save → S04a. Declining keeps the resident here; no community access. member_id is generated once on member-record creation and never changes with the number. No periodic re-verification or MVE-1 phone-uniqueness gate. Final consent copy remains TEST. Back edits account fields; keep an unchanged number verified. SOURCE: INV S03; REQ User Profile; FUNC Sep 8 — consent/ member ID.

S04a — Resident / structural step

YOUR SAVED HOME

Add your home details

These details help you share practical information if a claimed Request or Offer needs it.

Complete home address *

25 Example Lane
Boulder, CO 80302

Entry instructions *

Use the side entrance.

Private until you choose to share

For a claimed task, you choose what to share with the other participant. Access defaults to one day and expires automatically. You can end it sooner.

Required fields are marked *. Your address and entry instructions are not shown on your community profile.

Save and continue

Back

S04a • Resident / required fields filled, private by default. Fictional example address and entry note; no real household data. Complete address and entry instructions are mandatory. Door/gate codes belong inside entry instructions. Save and continue → S04b after successful save; failed save keeps values and retry in Pass 2/A. Address saved here feeds the later S05 location result. SOURCE: INV S04; REQ User Profile / Deliberate helper sharing; FUNC Sep 3.

S04b — Resident / structural step

PRACTICAL DETAILS · OPTIONAL

What might help?

Add useful details now or leave these blank. They stay private until you choose to share them for a claimed task.

Pets or animals

Example: dog in fenced yard

Driveway or physical access

Example: steep driveway

Utility shutoffs

Example: breaker box located ...

Mobility or practical needs

Example: assistance with stairs

Save and continue

Skip optional details

Back

S04b • Resident / empty optional fields. Starter examples are placeholders, never saved unless actively adopted/replaced. Skip → S05; Save and continue → S05 after success. Filled/partial/edit/save failure variants Pass 2/A. No standing household-member, ownership, medical-record, equipment-inventory, or biography field. Sharing is later task-specific (S24/S25), not granted by this form. SOURCE: INV S04; REQ User Profile; FUNC Sep 3 — optional fields.

S05 — Resident / structural step

YOUR HOME LOCATION

Does this look close?

25 Example Lane
Boulder, CO 80302

● Saved home

LHL uses this saved-home location to match sourced incident information. The pin can be approximate if it is close to your home.

LHL notifications: On

Use your saved-home location for relevant incident notifications. Device permission is managed separately.

Turn LHL notifications off

Use this location

Edit address

S05 • Resident / usable address-derived point, OS permission allowed for this representative case. Illustrative static map and fictional address; not a real geocoding result. Use this location → S07 boundary (A2); Edit address → S04a then new map result. No dragging, GPS, parcel boundary, or administrator verification. Approximate-but-close is acceptable. Corrected/ambiguous input and preference combinations → Pass 2/A. SOURCE: INV S05; FUNC Sep 3 — saved-home location/address recovery.

S05b — Resident / structural step

YOUR HOME LOCATION

Your address is saved

25 Example Lane
Boulder, CO 80302

We couldn't locate this address

Point-based incident notifications won't be available until there is a usable home location. You can still use the rest of LHL.

If the address is correct, continue setup. You can return to update it later.

LHL notifications: On

A usable home location is still needed for point-based incident notifications. Device permission is managed separately.

Turn LHL notifications off

Continue setup

Edit address

S05b • Resident / legitimate saved address, no usable coordinate. This alternate is drawn now because it changes the next action and tests continued setup. Continue setup → S07 boundary (A2); Edit address → S04a → fresh S05 result. Lack of a point blocks point-based incident notifications only. No operator-review queue. Resolving, correction suggestions, invalid-address recovery → Pass 2/A. SOURCE: INV S05; FUNC Sep 3 — no usable coordinate/continued access.
