

Gate 3 A1 Round 2 — Founder Comments

Separate second-phase reference · 11 new messages · captured 2026-09-10 · author: John Elliott

Open only after recording initial findings from the canonical sources and unannotated layouts. These are review observations in chronological order, not automatic product or layout approvals. Three short comments are preserved verbatim; eight entries preserve the captured substance because the read-only Figma credential expired before final packet regeneration. Use the live linked threads for exact wording. John's later explicit dispositions are canonical in `docs/04-decision-log.md`.

1 · Thread 1921649674 · S01

Sheet 01 (37:2), pin x=581 y=715 · [frame 37:30](#)

Approved for now. This is functionally right but design can really make this better.

2 · Thread 1921651442 · S03d

Sheet 01 (37:2), pin x=2673 y=960 · [frame 38:61](#)

Will this take you back to S03A?

3 · Thread 1921654586 · S04a · captured substance

Sheet 02 (37:126), pin x=209 y=313 · [frame 37:155](#)

Need more space for both. The Address is necessary as it is what triggers everything. We should explain that here.

4 · Thread 1921656137 · S04a · captured substance

Sheet 02 (37:126), pin x=365 y=631 · [frame 37:155](#)

I think the privacy explainer should go above the access instructions. The Address is needed, while ACCESS is private until you choose to share it.

5 · Thread 1921656656 · S04b

Sheet 02 (37:126), pin x=714 y=247 · [frame 37:180](#)

CHANGE: Additional Home Details

6 · Thread 1921662223 · S05 · captured substance

Sheet 02 (37:126), pin x=1153 y=569 · [frame 37:211](#)

Combine these two boxes. POC: Your address helps LHL curate appropriate alerts, warnings and Events for your home. It does not have to be exact, but it should be close. If the pin or displayed address is wrong, edit your address. Skip the notification copy here because that is the next step.

7 · Thread 1921664386 · S05b · captured substance

Sheet 02 (37:126), pin x=1494 y=426 · [frame 37:237](#)

Functionally right. Future copy needs to make the alerts and Events consequences clear the first time.

8 · Thread 1921667310 · S02 · captured substance

Sheet 02 (37:126), pin x=1965 y=971 · [frame 37:54](#)

I would like a Y/N answer here. Why is there a Not Now option, and what is the default?

9 · Thread 1921668147 · S02 · captured substance

Sheet 02 (37:126), pin x=2052 y=246 · [frame 37:54](#)

The structure is correct with four boxes. POC: explain what notifications cover; say LHL complements or republishes official alerts but does not replace them; recommend turning notifications on; and say we limit notifications to avoid overcommunication.

10 · Thread 1921672242 · S02b · captured substance

Sheet 02 (37:126), pin x=2518 y=973 · [frame 38:82](#)

Same question about this button. Why is there a Not Now option?

11 · Thread 1921673965 · S02-OS · captured substance

Sheet 02 (37:126), pin x=2745 y=684 · [frame 38:103](#)

Why do we need Not Now? Is this a legal or developer requirement?

Subsequent explicit dispositions: John approved removal of the app-level `Not now` actions; confirmed that usable home location is critical to all alerts/Event Types in the approved incident Matrix but not community actions or all app use; and approved the current official-alerts placeholder sentence. Those decisions are summarized here only to distinguish later approvals from the original comments; canonical wording controls.

Verbatim entries: threads 1921649674, 1921651442 and 1921656656. Other text is a faithful substance summary from the successful read performed immediately after John's finished notice, not represented as an exact quotation. Pin coordinates are relative to the named Figma review sheet. No replies were present in these 11 new threads.
