

Gate 3 A1 Round 2 — Unannotated Layout Reference

Snapshot prepared 2026-09-10 · X01 and S01–S05 · Claude's remaining bounded re-review

Read the Markdown companion and canonical sources first. Record initial findings from this unannotated reference before opening the separate comments PDF. This snapshot remains exactly as John reviewed it; S02 and S02b still show two app-level defer controls that were superseded after his review and await a later authorized redraw.

JOHN — Review A1 · ROUND 2 here

Second review of the same A1 screen set: X01 and S01–S05. Review the resident’s flow, missing information and meaning—not final visual design. Original Round 1 screens/comments stay to the left as history.

REVIEW NOW

- Flow: Do the steps come in a sensible order? Anything unnecessary, confusing or missing?
- Next actions: Is it clear what happens next, how to go back, and what happens if permission is declined or a home location is unavailable?
- Information: Are the right fields and explanations present? Are required versus optional details and consent clear?
- Trust and meaning: Can a resident tell what stays private, what may be shared, and what LHL does or does not do? Flag misleading or unsafe wording now.
- Functional placement: Flag information or controls that are hard to find, grouped confusingly, or shown too late. Explain the usability problem—not the pixel position.

HOW TO COMMENT • Leave native Figma comments on the ROUND 2 screens, one issue per comment. Tell me what confused you and what you expected. Existing comments on Round 1 remain unchanged. Tell Cody when this review is finished; only then will Cody prepare Claude’s updated Markdown/PDF/comments packet. Claude’s remaining bounded re-review goes to John first. No layout is self-approved.

NOT THE FOCUS OF THIS PASS

- Final colors, fonts, branding, icons, imagery or visual polish.
- Exact spacing, alignment, button dimensions or pixel-perfect positioning.
- Where the wireframes sit on the Figma canvas. That is review-board organization, not app navigation.
- Final copy, sentence-by-sentence wordsmithing or legal-copy approval. BUT unclear meaning, misleading promises and safety/privacy concerns are in scope now.
- Technical implementation, provider configuration, animations or working buttons. These are static layouts, not a functioning prototype.
- Some screens and error situations are planned for later. If something feels missing or confusing, flag it—we’ll check whether it’s already covered in the plan.

Sheet 01 — invitation, entry, sign-in, and account/contact

X01 · S01 · S01-signin · S01-code · S03a · S03b · S03d · S03c

A1 · ROUND 2 / 01 — Email, entry, sign-in and account setup

READ LEFT TO RIGHT • Sign-in/code are the returning-user branch; new accounts use S03a → S03b → S03c. Duplicate number is an alternative outcome, not a required step.

X01 — External invitation

COMMUNITY INVITATION EMAIL

You're invited to try LHL

Coordinate practical help with people in your community and review sourced conditions near your saved home.

1 Download and install

Use the app link provided by your community administrator.

Download LHL

2 Save your community join code

COMMUNITY JOIN CODE
SAMPLE-27

You'll enter this code after setting up your profile.

Membership requires approval

Installing LHL or having a join code does not give you access to the community. An administrator must approve your request.

X01 • External email, not app UI.
Administrator → invitee; phone-readable installation link plus separate join code for S07. Neither grants membership. Sample code/copy only; no email provider selected.
SOURCE: INV X01; approved email decision. Invalid-invitation recovery: Pass 2/A.

S01 — Resident / structural step

WELCOME TO LHL

A place to coordinate

Review sourced conditions and coordinate practical Requests and Offers with your approved community.

Start with your own profile

Each adult has their own profile, even when they share a home.

Your safety comes first

Follow instructions from public authorities. If you believe you are in danger, move to safety and call 911 when able. LHL does not contact emergency services.

Create account

Sign in

S01 • New or returning signed-out resident.
Create account → S03a; Sign in → SMS entry. Signed-in residents bypass this screen and reach their saved starting screen, subject to access restrictions.
Fixed safety is always present; no rotating messages. Skippable guidance later at S11 remains; no requirement can be skipped.
SOURCE: INV S01; approved entry/SMS/safety decisions.

S01-signin — Returning / signed out

WELCOME BACK

Sign in to LHL

Enter the phone number linked to your existing account. No password needed.

Phone number *

(303) 555-0148

We'll text you a sign-in code. Signing in opens your existing account; it does not create another profile.

Send sign-in code

Back

S01-signin • Existing account / signed out.
SMS sign-in is separate from account creation and periodic contact re-verification. Valid signed-in sessions skip this route. Send → S01-code; Back → S01.
Unknown-number/recovery and resend/abuse presentation: Pass 2/ A; secure proof, duplicate-response privacy and account recovery: Gate 4. Never transfer an account solely from possession of a recycled number.
SOURCE: approved SMS/unique-phone decisions.

S01-code — Returning / code sent

SIGN IN TO YOUR ACCOUNT

Enter your sign-in code

We sent a sign-in code to (303) 555-0148.

Verification code

Enter the code

Return to your existing account

A valid sign-in returns you to your saved starting screen. Your profile and home details stay with your account.

You won't need a new code each time you open LHL while you remain signed in.

Send another code

Change phone number

Sign in

Enter the code to continue.

S01-code • Sign-in code sent / awaiting input.
Successful authentication → saved starting screen, respecting incomplete setup, membership and suspension. Does not repeat sign-up or grant membership. Bad/expired code differs from connection failure; detailed variants Pass 2/A.
Existing-owner sign-in is allowed even though duplicate account creation is blocked. Session/recovery enforcement: Gate 4.
SOURCE: INV S01/S03; approved entry/auth decisions.

S03a — Resident / structural step

YOUR PROFILE

Let's start with you

Create your own adult profile. Fields marked * are required.

First name *

Alex

Last name *

Rivera

Preferred first name (optional)

Alex

Phone number *

(303) 555-0148

Use a number that can receive a text message. You'll also use text codes to sign in when needed.

Send verification code

Back

S03a • Resident / filled contact form, before verification.
Illustrative fictional data only: Alex Rivera; reserved 555 number. Fields map to approved inputs; no custom display name, household label, or visible member_id.
Send code → S03b on success; incomplete/invalid/save failure states Pass 2/A. Phone field is required and must receive SMS.
SOURCE: INV S03; REQ User Profile; FUNC Sep 8 — SMS/contact/ member ID.

S03b — Resident / structural step

VERIFY YOUR NUMBER

Check your text messages

We sent a verification code to (303) 555-0148.

Verification code

Enter the code

Verify this number once

We verify that you can receive a code at this number. This does not guarantee future call or text delivery.

If you replace your number later, you'll verify the new number before it becomes active.

Send another code

Change phone number

Verify number

Enter the code to continue.

S03b • Account creation / code sent.
Valid code and successful verification → S03c; duplicate assignment → S03d, not a second account. Check/proof timing remains Gate 4. Resend stays here; Change number → S03a.
Invalid/expired code versus connection failure, resend limits and recovery: Pass 2/A. No timer/code length selected.
SOURCE: INV S03; REQ User Profile.

S03d — Duplicate number / creation blocked

ACCOUNT CREATION

This number is already in use

(303) 555-0148

We can't create another account

This phone number is linked to an existing account. Sign in to that account or use another number.

If this is your account, choose Sign in. You won't need to create your profile again.

Sign in

Use another number

S03d • Account creation cannot assign an already-used number.
Sign in → S01-signin; Use another number → S03a, preserving other entered fields. No second account, merged profile or shared-number exception. Replacement numbers have the same uniqueness rule.
This screen does not decide when proof/collision checks run. Gate 4 must protect against enumeration and recycled-number takeover.
SOURCE: INV S03; unique-phone decision.

S03c — Resident / structural step

MEMBER CONTACT

How members can reach you

Phone verified

(303) 555-0148

Approved members of your community can use Call or Text on your profile to open their device's phone or messaging app.

Your number is not printed on your community profile, but the native app may reveal it to the other member or their device.

LHL does not send, store, or guarantee delivery of those calls or texts.

☐ I agree to member contact

Required to participate in the pilot.

Your home address and entry instructions remain private unless you deliberately share them for a claimed task.

Continue

Back

S03c • Verified phone; required consent unchecked.
Continue requires consent and successful save → S04a. Back → S03a; unchanged phone remains verified. Unique phone assignment is enforced; a collision cannot create a second account. member_id stays internal and immutable.
No periodic contact re-verification; necessary SMS sign-in is separate. Final consent copy remains draft.
SOURCE: INV S03; REQ User Profile; approved SMS/unique-phone decision.

Sheet 02 — home details, location, and notifications

S04a · S04b · S05 · S05b · S02 · S02b · S02-OS

A1 · ROUND 2 / 02 — Home, location and notification outcomes

READ LEFT TO RIGHT • Location found: S05 → S02. No usable location: S05b → S02b. Either primer may lead to the OS boundary; Not now goes directly to S07 (A2).

S04a — Resident / structural step

YOUR SAVED HOME

Add your home details

Save your home for local Events and practical help on a claimed task.

Complete home address *

25 Example Lane
Boulder, CO 80302

Access instructions *

Enter access details: entrance, lockbox, keypad, hidden key or gate code.

Private until you choose to share

Sharing always includes your full address. Choose which other details to include. Only the other task participant gets access: one day by default, automatic expiry, or end it sooner.

Required fields are marked *. Your address and entry instructions are not shown on your community profile.

Save and continue

Back

S04b — Resident / structural step

PRACTICAL DETAILS · OPTIONAL

What might help?

Add useful details now or leave these blank. They stay private until you choose to share them for a claimed task.

Pets or animals

Example: dog in fenced yard

Driveway or physical access

Example: steep driveway

Utility shutoffs

Example: water shutoff in crawlspace; breaker box ...

Mobility or practical needs

Example: assistance with stairs

Save and continue

Skip optional details

Back

S05 — Resident / structural step

YOUR HOME LOCATION

Does this look close?

25 Example Lane
Boulder, CO 80302

No Events without a home location

You won't receive Event or alert notifications, and Events won't appear in your feed until you add a usable home location.

Check your address first. If it is correct, you can continue without Events and fix the location later.

Community coordination still works

After community approval, you can use Requests, Offers and messages. Their notifications can still be enabled.

Use this location

Edit address

S05b — Resident / structural step

YOUR HOME LOCATION

We couldn't locate your home

25 Example Lane
Boulder, CO 80302

No Events without a home location

You won't receive Event or alert notifications, and Events won't appear in your feed until you add a usable home location.

Check your address first. If it is correct, you can continue without Events and fix the location later.

Community coordination still works

After community approval, you can use Requests, Offers and messages. Their notifications can still be enabled.

Edit address

Continue without Events

S02 — Resident / structural step

BEFORE YOU CONTINUE

About notifications

Get eligible local Event updates, new community Requests and Offers, claims, private task messages and important coordination changes.

Keep other sources available

LHL complements official alerts; it does not replace them. Notifications may be delayed or unavailable, and delivery is not guaranteed.

You remain in control

We recommend allowing notifications. Your device settings are the only on/off control for all LHL pushes during this pilot.

We limit notifications to these activities. Next, your device asks for permission; allow or decline, then continue to joining your community.

Choose device permission

Not now — continue

S02b — No location / community primer

BEFORE YOU CONTINUE

Community notifications

You can still get notifications for community Requests, Offers, claims, private task messages and important coordination changes.

Events are still unavailable

Allowing notifications won't enable Event or alert notifications or the Events feed. First, add a usable home location.

You remain in control

We recommend allowing notifications. Your device settings are the only on/off control for all LHL pushes during this pilot.

Notifications can be delayed or unavailable; delivery is not guaranteed. Choose device permission, then continue to joining your community.

Choose device permission

Not now — continue

S02-OS — External permission boundary

EXTERNAL DEVICE HANDOFF

Your device asks next

Boundary reference — not an LHL screen or a proposed iOS/Android dialog.

If you allow

Return to LHL and continue to S07: enter your community join code. Eligible notifications may be delivered; membership approval and location rules still apply.

If you decline

Return to LHL and continue to S07. No LHL device pushes; app access continues. You can change permission later in your device settings.

Not now on S02 skips this prompt and also continues to S07. Already-decided OS permission must be handled honestly; do not promise the OS will show another prompt.

S04a • Required address shown; entry instructions empty. Access instructions is the label for canonical entry instructions, not a new field. Guidance is placeholder only and never saved. Continue is unavailable until required fields are entered. Door/gate codes stay inside this field. Save → S04b only after success; failure preserves input. Address stays on S04. SOURCE: INV S04; REQ Deliberate helper sharing; A-01-A-03.

S04b • Resident / empty optional fields. Starter examples are placeholders, never saved unless actively adopted/replaced. Skip → S05; Save and continue → S05 after success. Filled/partial/edit/save failure variants Pass 2/A. No standing household-member, ownership, medical-record, equipment-inventory, or biography field. Sharing is later task-specific (S24/S25), not granted by this form. SOURCE: INV S04; REQ User Profile; FUNC Sep 3 — optional fields.

S05 • Usable address-derived home point; permission not yet requested. Use this location + successful save → S02; wrong result/Edit address → S04a, preserving other data, then fresh lookup. Approximate-but-close may be accepted; a city/ZIP-only point is not enough. Map/address are fictional and static. No GPS, draggable pin or admin verification. Lookup/preview/save errors: Pass 2/A. SOURCE: INV S05; approved location/sequence decisions.

S05b • No usable resident-accepted home location. Edit address → S04a then new lookup; Continue without Events → S02 no-location variant. Both losses disclosed before that action: no Event/alert pushes and no personalized Events feed. Community access rules still apply. S12/S13 must retain a location-needed/Edit address state in their assigned chunks, not imply no incidents. SOURCE: INV S05; approved no-location decision.

S02 • Usable accepted home location; OS permission not requested. Choose device permission → native OS prompt → S07 whether allowed or denied; Not now → S07 without prompting. Access remains available; membership still requires approval. OS-only control; denied/later-disabled → device settings (S30 / Pass 2/A). No duplicate in-app switch. Eligible activity/privacy/ source limits remain. SOURCE: INV S02; 01/D3/D4.

S02b • No usable home location; community pushes only. Choose permission → native OS prompt → S07 after allow/deny; Not now → S07 without prompting. OS permission does not restore Events. Approved community access still required. S12/S13 carry location-needed/Edit address in their assigned chunks; OS recovery in S30 / Pass 2/A. SOURCE: INV S02/S05; approved no-location/01/D3/D4.

S02 external boundary, not an extra app parent. Shows outcomes only; OS wording/buttons are not redesigned. Not now never triggers the prompt. A previously denied or disabled permission routes to OS settings, not an assumed repeat prompt. No location: both outcomes retain no Event feed/alerts. Saved location + declined permission: Events feed remains available. SOURCE: INV S02; approved notification/access boundaries.

Unannotated Figma export · current snapshot includes the two superseded app-level defer controls
